

This is the Create Account home page a first time user encounters. User must create an account with unique username in order to use the inventory app.

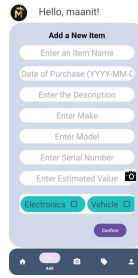

The existing user can just login

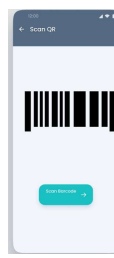

Logging in with existing account

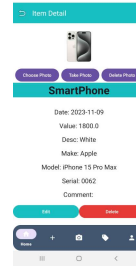

Here when logged in with existing user already stored items get displayed with details and image

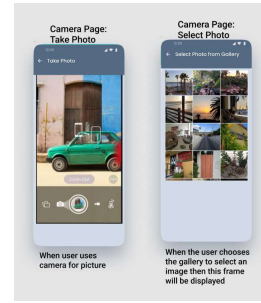

When add button on the navigation bar is pressed it shows a fragment to add detail this will also show a camera icon on the side of serial number to scan bar code

It will get the serial number from barcode

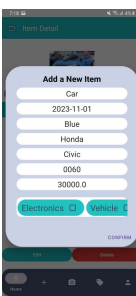

This is when an item is viewed and its details are shown with edit and delete button

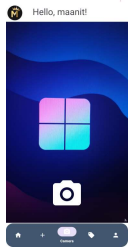

When user uses camera for picture

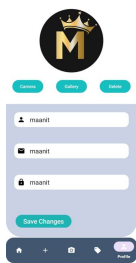

When the user chooses the gallery to select an image then this frame will be displayed

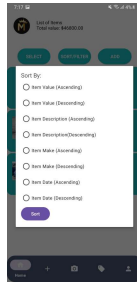

When edit button is pressed you can edit details

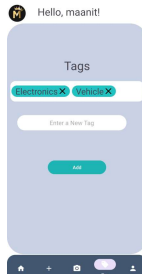

When Camera button on the navigation bar is pressed it clicks photo and save to gallery

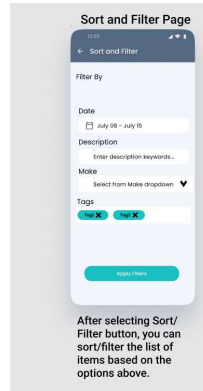

User page to add photo And see profile details

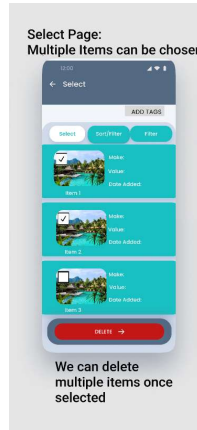

When sort/filter button is pressed then this dialogue box appears and user can choose the required sort radio button and the list will be sorted accordingly.

When Tag button pressed on navigation Way to make tag is displayed

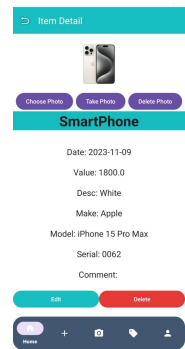

After selecting Sort/Filter button, you can sort/filter the list of items based on the options above.

Select Page: Multiple Items can be chosen

We can delete multiple items once selected

If we want to delete this item then delete button is pressed
